1 IPR Releases and Patent Disclosure

There are no known IPR claims on the material in this document. As per the TM Forum bylaws, any TM Forum member company that has IPR claims on this or any TM Forum specification needs to make the claims known to the TM Forum membership immediately.

2 Administrative Appendix

This Appendix provides additional background material about the TM Forum and this document.

2.1 Use and Extension of a TM Forum Business Agreement

This set of documents defines an implement-able set of the artifacts which are used in at least two different other DDPs and constitute the XML Interface Implementation Specifications (IIS) for the Framework entities and operation interfaces: TMF864_FMW_XML.

It has been elaborated from the Interface Agreement document. While this Interface Implementation Specifications contains sufficient information to be a “stand alone” document, it is better read together with the Interface Agreement document: TMF612_FMW.

It is expected that this document will be used:

- As the TM Forum reference XML interface specification
- As input to a service Provider’s Request for Information / Request for Proposal (RFI/RFP—RFX)
- As input for vendors developing COTS products
- As a source of information for other bodies working in this area
